

# Positron +1e extension by Garrick Aden-Buie

<https://github.com/gadenbuie/positron-plus-1-e>

## Shiny: Debug Shiny apps

The screenshot displays the Positron IDE interface. On the left, the R code for a Shiny app is visible, with a red circle highlighting the debug button in the top toolbar. The right pane shows the app's output, which includes a line plot of altitude (deg) vs time (Time) and a plot of air mass vs time. The app is titled 'Air mass calculator' and shows sunset and sunrise times for a given date (2022-07-22). The target object(s) are listed as M1, NGC35, and PLX299. The latitude and longitude are both set to 0. A map is shown at the bottom right of the output pane.

## Air: R Language Formatter

The screenshot displays the RStudio IDE interface. The top-left pane shows the 'Search Results' for 'theme\_ridges'. The top-right pane shows the 'Console' with R code for creating a ridgeline plot. The bottom-left pane shows the 'Environment' pane with various packages installed. The bottom-right pane shows the 'Source' editor with R code for creating a ridgeline plot.
